

*Cont
A1*
separate said desired protein from said virus particle; and
recovering the separated desired protein.

A2
13. (Amended) The method according to claim 9, wherein said
protein having a plurality of membrane-spanning segments is a
protein having an odd number of membrane-spanning segments, and
said desired protein does not have a membrane-spanning segment.

A3
15. (Amended) The method according to claim 9, further
comprising the steps of cleaving the recovered fusion protein to
separate said desired protein from said protein having a plurality
of membrane-spanning segments, thereby detaching said desired
protein from said virus particle; and recovering the separated
desired protein.
